

include/barry/barry.hpp

```
graph BT; A["include/barry/barry.hpp"] --> B["include/barry/models/geese-meat-likelihood_exhaust.hpp"]; B --> C["include/barry/models/geese.hpp"];
```

The diagram illustrates a set of include dependencies between three header files. At the top is a gray box containing 'include/barry/barry.hpp'. A blue arrow points from a white box below it, 'include/barry/models/geese-meat-likelihood_exhaust.hpp', up to the gray box. Another blue arrow points from a second white box at the bottom, 'include/barry/models/geese.hpp', up to the middle white box. All boxes have a black border.

include/barry/models
/geese/geese-meat-likelihood
_exhaust.hpp

include/barry/models
/geese.hpp
