

include/barry/barry.hpp

```
graph BT; A[include/barry/barry.hpp] --> B[include/barry/models/geese-meat-likelihood_exhaust.hpp]; B --> C[include/barry/models/geese.hpp];
```

The diagram illustrates a set of include dependencies between three header files. At the top is a box containing 'include/barry/barry.hpp'. A blue arrow points from a box below it, 'include/barry/models/geese-meat-likelihood_exhaust.hpp', up to the top box. Another blue arrow points from a box at the bottom, 'include/barry/models/geese.hpp', up to the middle box. The top box has a gray background, while the other two are white.

include/barry/models
/geese/geese-meat-likelihood
_exhaust.hpp

include/barry/models
/geese.hpp
